1 Introduction

1.1 Purpose of this document

This guide has been created to allow Imagicle Digital Fax users to send, receive and browse fax documents and generate reports based on fax traffic, customized with a choice of filters to get exactly the required data.

Imagicle Digital Fax offers multiple means of accessing to fax functionalities:

- Web interface
- Jabber for Desktop/mobile clients
- Webex Desktop client
- Microsoft Teams client
- Email client
- Multifunction printer
- Virtual print2fax driver

Each user can leverage their own LDAP/Active Directory credentials to login to Imagicle Digital Fax, without having to learn an additional username and password.

The access is fully managed by an intuitive and easy to use web interface, available in seven different languages: English, German, French, Spanish, Arabic, Polish and Italian.

1.2 Imagicle UCX Platform overview

Digital Fax is included in the UCX Platform, which provides a set of best in class applications empowering and simplifying existing collaboration offering.

The Imagicle UCX Platform addresses the needs of organizations from any vertical, providing an awesome experience to all users, from their Jabber desktop and mobile clients, their IP Phones and browsers.

All the applications can be accessed through an easy to use Web Interface: Call Analytics, Contact Manager, Attendant Console, Advanced Queueing, Auto Attendant, Call Recording and more.

The web interface provides a single integrated environment to get access to all functionalities by logging in once.

In an international multi-site environment, each user has a localized access to Imagicle server with own language.

2 Imagicle Digital Fax

2.1 Easy, convenient and confidential IP Digital Fax solution

With Digital Fax you can send and receive faxes directly from your computer, via e-mail or web interface, by printing a document or using the gadget for Jabber/Webex/MS-Teams. You can also manage faxes anywhere using your smartphone or tablet and, if some of your colleagues are stuck in the past, they can continue sending and receiving faxes via the network multifunction printer.

Digital Fax drastically changes how you send and receive faxes, without having to learn a thing. You can start working immediately, using the same tools you are used to. It's as easy as printing a document or sending and receiving an e-mail.

Faxes are delivered to and sent from your personal email box and from the reserved web portal, no matter where you are

There's no paper to print and archive, no consumables and no time wasted managing fax machine maintenance. Faster, smarter, easier and greener!

3 Digital Fax – How to send faxes

Digital Fax allows fax sending by means of 8 different ways:

3.1 Send a fax through e-mail

Digital Fax allows fax sending straight from your desktop/notebook email client.

Just send a standard email to digitalfax@mycompany.com (pls. ask your company's network administrator about correct email address).

Digital Fax will receive your e-mail, will convert it to fax format and will send it to the selected destination. Fax transmission notification will be returned to your personal email address.

To send a fax, please follow this procedure:

- Enter digitalfax@mycompany.com in "To:" field
- Enter destination fax number in "Subject" field 06123456
- Add a text into email body and/or an attachment
- Send email

Destination name can be added in Subject field, too. In this case, fax number should be placed after destination name, between brackets: [Joseph White \(\(06123456\)\)](#)

Email text will be used as fax body. Moreover, you can add any document type (same drag'n'drop method used for standard email) to be sent as fax body.

Digital Fax email sending allows multiple attachments in same transmission.

Allowed file formats: doc, docx, gif, jpeg, jpg, pdf, png, rtf, tif, tiff, txt, xls, xlsx.

It is also possible to send a fax specifying destination number straight into "To:" field. For example: 123456789@digitalfax.mycompany.com (this option must be enabled by your email administrator).

Some **special options** are available as well, separated by semicolon:

- Enter a fax subject: if you need to specify a subject, you can add it after fax number. [Joseph White \(\(012345678\)\) Order confirmation](#). It will be printed in the cover page.
- Send to multiple destinations:
 - [12345678; 222333444; 555222333](#)
 - [Mary Smith \(\(12345678\)\); Joseph White \(\(87654321\)\)](#)
 - Or you can send a fax to all contacts included into a Speedy directory (Our solution to manage centralized corporate directories) ([directoryname](#))
- Select an available cover: [CoverPage\(\(URGENT.COV\)\)](#). Ask your administrator about available covers or scroll list at <http://Fax Server.mycompany.com> --> [Fax Body](#), dedicated pull-down menu
- Postpone sending: [SendAt\(\(14:30\)\)](#)

E.g. [Joseph White \(\(012345678\)\) Order confirmation; CoverPage\(\(URGENT.COV\)\); SendAt\(\(14:30\)\)](#)

If you don't remember all special options, just send an email at digitalfax@mycompany.com including [help](#) in subject field. Digital Fax will return you an email with all available options.

NOTE: Any spurious prefix added to email subject by the email server, not included in above special options, causes a fax transaction failure. If that's the case, please contact Imagicle Tech Support for further information.

3.2 Send a Fax from Web interface

Digital Fax allows you to send faxes from an intuitive web interface.

Just open a supported web browser, like Edge, Firefox, Chrome or Safari, and enter the name or IP address of Imagecle server. This will bring the Imagecle UCX Suite login page:

The login page displays the text "Welcome to Imagecle UCX Suite". Below this is a text input field containing the email address "john.smith@company.com" with a clear button (X) on the right. At the bottom is a blue "Continue" button.

Any easy wizard will guide you through a quick fax sending.

Once logged in, Imagecle UCX Suite's main menu is displayed, showing all application available to users. Pls. click on "Digital Fax" icon to access to Digital Fax pages, then select "Send a Fax".

The "Recipients" screen has two main sections. The top section contains input fields for "Recipient Name*" and "Recipient Fax Number*", with a "Find contact" button. The bottom section, titled "List of selected recipients", shows a list of contacts: "Added by user" (Robert Green(0448976722), Mike Gordon(05680279902)) and "Selected from directories".

Recipients' Data

Here you must manually add recipient's name and number. Click on + to add recipient to your sending list. You can add multiple recipients.

The "Select fax contacts or directory" screen offers two options: "Contact search" and "Select an entire directory". The "Select an entire directory" option is selected, showing a "Directory" dropdown set to "Resellers (17101)". Below is a table of contacts with columns for First Name, Last Name, Company, and Fax. The table lists several contacts, including Zakaria Mohammad, Zambon Marco, Zandre Klingenberg, Zeelah Davis, Zeffirino Perini, Zein Aldeen Abdalattif, and Zelina Rocha. At the bottom, there is a pagination bar showing "Item 17081 to 17090 of 17101" and "Add" and "Cancel" buttons.

FIRST NAME	LAST NAME	COMPANY	FAX
✓ Zakaria	Mohammad	Long View Systems	
✓ Zambon	Marco	Satel Net & Log srl	
✓ Zandre	Klingenberg	Bytes Systems Integration Pty Ltd	+27112057584
✓ Zeelah	Davis	Cisco Systems Inc. USA	
✓ Zeffirino	Perini	TeamSystem Communication (Voispeed)	
✓ Zein Aldeen	Abdalattif	Modern World Communications Company	
✓ Zelina	Rocha	Cilnet Comunicaciones	

You can also add a recipient by choosing it from Contact Manager directories (if licensed) by clicking on +.

A window pops up, allowing you to search for a contact in corporate directories by name, surname, company.

You can even send a fax to a whole directory (customers, suppliers, etc.), if relevant option is enabled by the administrator. This feature is useful for ad campaigns, promo, communications, etc.

Fax Body

Subject:

Cover page:

Add Attachment: ☒

Text:

Pls. find enclosed your invoice.
Kind regards,
John Smith

Fax Body

In this section you can enter fax subject to be included in the fax cover you can choose from pull-down menu. Moreover, you can manually add additional text to be included in fax body and you can attach a file to your fax body.

Digital Fax

Global Inbox | Global Outbox | [Send a Fax](#) | Inbox | Outbox | Preferences

Select files

Please select the files you want to send as a fax

Change	FAX sample.docx	Delete
Change	Blue's Attendant Console ITA.pdf	Delete
Change	dati nichcs11.txt	Delete
Add	No file selected	

Add attachment

If you check "Add Attachment" flag, push-button at the bottom of the screen will turn from "Send Fax" to "Select File". By clicking it, you can browse your disk and choose file to send as fax body.

You can attach multiple documents: doc, docx, gif, jpeg, jpg, pdf, png, rtf, tif, tiff, txt, xls, xlsx.

Send Fax

☒ Send a return receipt

☒ Attach a copy of the fax

Priority:

☒ Send the fax as soon as possible

☐ Send the fax exactly at this time

Additional Options

In this section you can decide to:

- receive a fax transmission notification straight into your email address
- attach a fax copy to above notification
- Select a priority: low-Normal-High
- Send fax now
- Choose a deferred fax transmission

Once all data have been entered, just click on "Send Fax" to enqueue your transmission.

3.3 Personal Fax Outbox

You can verify, whenever you like, current status of your outgoing faxes by clicking on “Outbox”. Here you can see a detailed list of all your outgoing and already sent faxes: status, recipient’s name and number, subject, sending date & time, end of transaction date, document ID and sending PC name. “Status Detail” column provides useful and additional details regarding any possible transmission errors.

When your list includes many items, you can enhance and speed-up your search by applying customized filters.

You can:

- Download sent faxes as TIFF or PDF
- Delete faxes
- forward a fax

3.4 Department/Company Global Fax Outbox

If you are an administrator or if you manage department’s faxes, you also have access to “Global Outbox”, where you can find a list of all sent documents at corporate/department level. For each sent fax, you can view the following details: status, recipient’s name and number, sending date/time, end of transmission date, document ID and Imagicle server name.

It is possible to quickly search for specific fax transmissions by easily applying customized filters.

You can:

- delete single fax transmission
- export list into csv or Excel file
- delete whole list from database

3.5 Send a Fax from MFP printer

With Network Scanner, Digital Sender, MFP network printers it is possible to send paper documents using Digital Fax, so that they get archived, and email notification is sent.

Sending a fax is easy and quick: just place paper sheets on scanner, select “fax” or “Scan-to-email” button and enter recipient’s number:

- Scanned sheets are sent to Digital Fax via email (Internet Fax mode)
- Digital Fax returns notification to email address associated to MFP printer
- If you MFP printer allows user’s authentication, fax is sent from own user and relevant notification is sent to own email address

If your MFP printer does not include a native fax server integration, you can always use standard “Scan to Mail” mode: document is scanned and sent to the dedicated account “digitalfax@mycompany.com” entering recipient’s fax number in subject field.

3.6 Print to Fax

If you are Digital Fax PC user, enabled to fax sending, you can leverage Imagicle Print to Fax feature to send a fax from any application, by just selecting “Print” option and choose “Imagicle print2fax” virtual printer. Relevant printer dialog shows currently selected document to print, allowing to manually add more documents by right-clicking or drag’n’drop more files into “Documents to send” window. If you add multiple documents, you can select how to send them, using the following buttons:

- Send as a single fax: All docs are sent as a single fax transaction, in the order you add them.
- Send individually: Each submitted doc is sent separately, adding cover page in each transaction

Same dialog invites you to add one or multiple fax destinations, manually entered or retrieved from a directory, the default cover page and an optional email address where notifications about fax transactions are sent. See samples in next page:

4 Digital Fax - How to receive faxes

Digital Fax supports 7 different means of fax reception:

4.1 Receive a Fax on your email

Digital Fax allows fax reception straight into your own e-mail email@mycompany.com as a PDF or TIFF attachment. You can choose to view received document straight from email or save it to disk. The mail notification can include a hyperlink to download the received document.

4.2 Receive a Fax using web interface

Digital Fax allows you to view received faxes from our user's friendly web interface.

Just open a supported web browser, like Internet Explorer, Firefox, Chrome or Safari, and enter the name or IP address of Imagicle server, as explained above for sending a fax.

Here you can retrieve all your received faxes, with relevant details: originator's and recipient's numbers, page numbers, reception date/time, reference number.

It is possible to quickly search for specific received faxes by easily applying customized filters.

You can:

- Download received fax as TIFF or PDF
- Delete a fax
- Forward fax

4.4 Forward incoming faxes to network printer

Digital Fax allows you to send incoming faxes straight to a network printer, as if you are using a traditional fax machine. This is a very useful functionality to speed-up company workflows which require the generation and storage of a paper fax copy.

In this case, Digital Fax allows each user/fax number to have a different printer (USB printers are supported too, if connected to Digital Fax server).

To enable this functionality, you need to map network printer on Digital Fax server (ask your network administrator).

IMPORTANT NOTE: This feature is available to UCX **on-prem** Suite customers only.

5 Digital Fax reports

Digital Fax reports are only accessible by the administrator, by selecting relevant “[Reports](#)” option from Digital Fax web interface.

Public Reports are preconfigured and ready to use reports and graphical dashboards, supplied by Imagicle with each Digital Fax installation. Each report can be further customized, using filters and groupings, and saved as a Personal Report for an immediate execution with a single click.

A screenshot on top of the screen shows a preview of available reports.

Digital Fax Global Inbox Global Outbox **Reports** Scheduled Reports Send a Fax Inbox Outbox Preferences Application Settings Mana

Personal Reports

Execute **Interactive Fax Detail Analysis** Search fax calls in an interactive grid

You can launch a report using default filter settings by just clicking on “Execute” button. Else you can click on “Options” button to display filter settings and adjust them to fit your needs.

Pls. have a look at below screenshot sample:

Digital Fax Global Inbox Global Outbox **Reports** Scheduled Reports Send a Fax

Report Options

Per faxes with date: This Month

Per direction: Outgoing

Per status: All

Per user: All

Remote number contains: 0584365593

Local number contains:

Run report
Save Report
Schedule

This sample shows how to setup filters for the following fax data:

- Fax transactions performed during last month
- Only outgoing faxes
- All fax transactions: successful, failed, etc.
- All fax-enabled users
- Faxes transmitted to 0584365593 fax recipient number
- Faxes transmitted from any local fax number

Once filter setup is done, you can “Run Report” and get results based on above filters. Once report has been executed, you can save the report settings into a [Personal Report](#) by clicking on “Save report” button. There you can add a personalized name and a report description.

You can also export report results as PDF, Word or Excel format.

Selected reports can be configured to be automatically sent by email to one user with specific intervals, so it is possible to get the needed reports into own email box without having to access to web portal. This is accomplished by clicking on “Schedule” button. Here you can set email subject, body text, email address or user, report format (Excel or PDF) and schedule recurrence. Report can be scheduled by minute, day, week or monthly base. See a sample screenshot below:

SCHEDULE

Report: Busy Channels

Email subject: Report for checking fax channels usage during last month

Email body:

[[FILTER]]

Sent to: User sales_imagicle_com

Attach report as: Pdf ☒ Don't send email if report is empty

Recurrence: Start date 30/04/2015 Start time 18:00 Every 1 Months

Save
Cancel

Each scheduled report is listed into “Scheduled Reports” Digital Fax menu.

6 Fax from Cisco Jabber and Webex clients

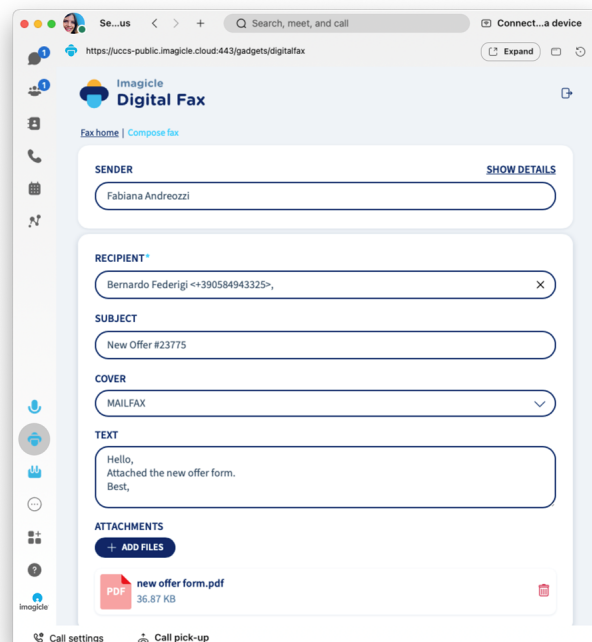

Digital Fax application includes a free gadget called **Fax**, which allows you to send faxes and check your personal outbox. You can access to this feature by clicking on “Digital Fax” button available on left pane.

You can login to gadgets by leveraging same credentials you use for web portal. The administrator can decide to keep the gadget sessions alive for a long period of time, as per your local policies.

The “Fax Wizard” option allows you to send a fax to multiple destinations, with multiple attachments.

“Outgoing Faxes” menu allows you to browse the list of sent faxes and it shows you the status of outgoing transactions happening in that instant. Successful fax transmissions are marked in **green**, ongoing fax transactions are marked in **orange**, failed fax transmissions are marked in **red**. This page is automatically refreshed every 10 seconds.

“Incoming Faxes” menu allows you to browse the list of faxes that are received or going to be received.

7 Application for Microsoft Teams PC client

Digital Fax is included into a free application for MS-Teams desktop/mobile client called **Imagicle**, which allows you to send faxes and check your personal outbox. You can access to this feature by clicking on “Imagicle” button available on left pane.

You can login to the app by leveraging same credentials you use for web portal. The administrator can decide to keep the app session alive for a long period of time, as per your local policies.

The “Fax Wizard” option allows you to send a fax to multiple destinations, with multiple attachments.

“Outgoing Faxes” menu allows you to browse the list of sent faxes and it shows you the status of outgoing transactions happening in that instant. Successful fax transmissions are marked in **green**, ongoing fax transactions are marked in **orange**, failed fax transmissions are marked in **red**. This page is automatically refreshed every 10 seconds.

“Incoming Faxes” menu allows you to browse the list of faxes that are received or going to be received.
