

Database wizard error 'This SQL Server version (x.xx) is not supported'

Applies from Application Suite 201x (any version)
to version Application Suite 201x (any version)

Description

Database configuration wizard error 'This SQL Server version (x.xx) is not supported' when you try to install Application Suite for the first time.

Cause

Microsoft SQL Server Management Objects Collection - Version 9.00.4035.00 was not installed due to an incompatible version of SQL Server previously installed in the same server.

Solution

In order to solve this issue, the installation of [Sql2005-Dec2008-SQLServer2005_XMO_x64.msi](#) is needed.

If the package installation fails:

1. Uninstall the manually installed SQL Server instance
2. Run the package installer again
3. Reinstall the SQL Server instance
