

# How to authenticate LDAP users logging in the Imagicle Application Suite web interface using LDAP SSL protocol

Applies from Application Suite 2018.1.1

## Applies to:

Imagicle Application Suite web interface

## Description:

When a user that should be authenticated by an external LDAP server, connects to Imagicle web interface, by default its credentials are authenticated to LDAP through standard (389) ldap port; follow this procedure to use instead SSL protocol through 636 port

## How-to:

1. Edit the ***FW.Profile.Api.config.xml*** file in <StonevoiceAS>\Apps\Fw\Settings\
2. Add the following line between <configuration> tags:  
***<preference key="Authentication.UseSecureLDAPConnection" value="true" />***
3. Save
