

## How to change SAS standard http port

### Applies to:

All IAS versions

### Description:

How to change the default http port (80) used by Application Suite

### Solution:

1. Open IIS Management console
2. Select the site that contains the applications fw and fwlib
3. Right-click and select "properties" on IIS6 or "Binding" on IIS7
4. Edit standard port
5. Open the file {program files}\StonevoiceAS\Apps\BillyBlues\Engine\Web\Versions\BB\@AppSettings.config
6. Go to line <add key="SAS\_SESSION\_PAGE" value="http://localhost/fw/apps/fw/api/get-username.asp" />
7. If has been set the port 80 change the word "localhost" in "localhost:8080" and save it
8. Stop and start the site or perform an IIS reset

Note: If Speedy is in use from cisco IP phones modify the URL in CCM as follow: :8080 after the name or server ip address
