

License Activation

Imagicle VoiceMail is licensed per channels, that is the total number of concurrent connected calls, regardless the number of users of your system. Web access to voicemail does not consume any channel.

Evaluation

Imagicle VoiceMail runs for 30 days in evaluation mode. During evaluation, all the features are available.

How to activate the license

The license can be activated by purchasing the product from Imagicle. You can enable the license in the license page as described in the UC Suite common configuration section of this guide.

To activate the license, follow the standard procedure you can find in the General configuration section.
