Product Overview

Fax virtualization has never been easier.

StoneFax is a completely software-based IP Fax Server that virtualizes fax management, making it fast, easy and safe to send and receive faxes at work. It delivers faxes directly to each user's desk via e-mail, web, multifunction printers, in Cisco Jabber and in mobility, on smartphones and tablets. In this video, you will get a brief overview of the product.

Sending and receiving a fax via email

Ready for any e-mail client and server.

Find how StoneFax allows fax sending/receiving straight from your desktop/notebook email client.
