

# Unable to retrieve recordings (new installation)

Applies from Application Suite 2017.6.2  
to version Application Suite 2017.6.3

## Applies to

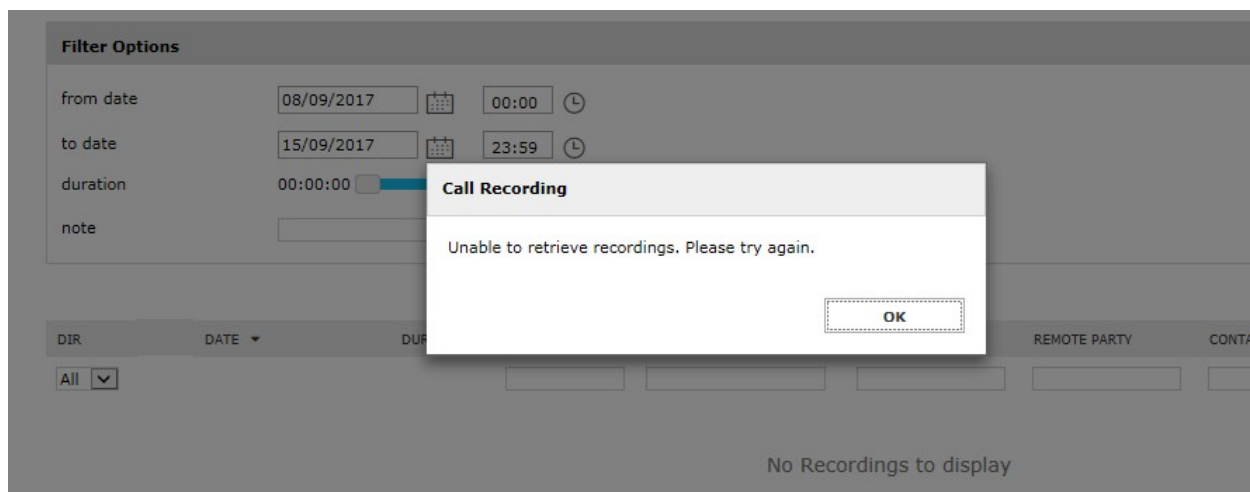

Imagicle Application Suite 2017.Summer.2 or 2017.Summer.3 - installed from scratch

## Description

When a standard "User" try to open recording web page it receives:

**"Unable to retrieve recordings. Please try again"**

While the Administrator user can see web page and all records without any error.

Looking at "<StonevoiceAS>\var\log\w3wp\recorder.log" log file it is possible to observe this exception:

Exception Type {Speedy.Core.Common.SvOperationFailedException}

**Message {FindContactsByPhoneNumber: exception occurred}**

StackTrace {

## Cause

The configuration file <StonevoiceAS>\Apps\Speedy\Settings\Speedy.Configuration.Global.config.xml contains wrong pre-defined values, instead an empty config.

## Solution

1. Edit file "<StonevoiceAS>\Apps\Speedy\Settings\Speedy.Configuration.Global.config.xml" and remove the following preference keys:
  - ◆ "directory.internalsdefaultdirname"
  - ◆ "directory.LocalDirectorySpecialDepartment"
  - ◆ "directory.ExcludeThisUsernameFromLocalDirectories"
2. Edit file "<StonevoiceAS>\Apps\Speedy\Server\System\Speedy.ini" and delete the following keys from section [Settings]:
  - ◆ internalsdefaultdirname
  - ◆ LocalDirectorySpecialDepartment
  - ◆ ExcludeThisUsernameFromLocalDirectories
3. Update directories content, following these steps:
  - ◆ Login to the IAS web portal as administrator and go to Speedy, Manage Service web page
  - ◆ Locate the "Internal contacts settings" section and change the radio button value. Click Save. This will start the local contacts update procedure, that may take some seconds..
  - ◆ Reload the page until the radio button becomes enabled (the local contacts update completed)
  - ◆ Change again the radio button value, back to the original value. Click Save.
