TSSO	Not tested
Silent Monitoring	Not tested
UCCX Agent	Not tested
Video Collaboration Endpoints Suite	Not tested
Conference Center	Not tested
PIN & Pwd Manager	Not tested

When upgrading to CUCM 15:

- Cisco JTAPI client must be updated using telisca Setup.
- New CUCM version must be checked and saved from IPS Administration, Global Config menu in CUCM Config screen.

Setup 7.7 and higher requires .Net Framework 4.7.2. It is installed by default on Windows Server 2019 and 2022 and needs to be installed on Windows Server 2016. Windows Server 2012 is no more supported.
